Subject: Offer of Internship – Confirmation Letter

Dear Aman,

We are pleased to offer you an internship position at **Contrivation Labs Pvt Ltd**, following the successful completion of your interview and evaluation process. We were impressed by your technical aptitude and enthusiasm, and we are confident that you will be a valuable addition to our team during your tenure with us.

Please find below the details of your internship engagement:

Designation:	Edge AI & Machine Vision Systems Engineering Intern
Department:	AI Research & Industrial Automation Systems
Reporting To:	Ramesh Rao, Chief Executive Officer (CEO)
Internship Duration:	2 Months
Start Date:	07 July 2026
End Date:	31 August 2026
Nature of Internship:	Paid Internship
Stipend:	INR 12000 per month, payable at month-end
Work Location:	Hybrid (Remote and On-site, as per project requirements) 2994, 12A Main, HAL2nd Stage, Indiranagar, Bangalore 560008
Working Days & Hours:	Monday–Friday, 10:00 AM – 6:00 PM

Role Overview & Key Responsibilities

As an **Edge AI & Machine Vision Systems Engineering Intern**, you will be an integral part of Contrivation Labs' initiative to build an automated, factory-grade red chilli sorting and quality-inspection system. Your core responsibilities will include:

- Designing and implementing an edge computing–based imaging solution, currently deployed on the OpenMV camera platform, for real-time red chilli detection on the factory line.
- Developing computer vision logic to accurately identify the stem region of each chilli and determine its correct physical orientation for downstream processing.
- Building and training Machine Learning models to classify and grade chilli quality directly from images captured on the edge camera hardware.
- Optimising ML models for on-device (edge) inference to ensure low-latency, real-time performance suited to factory-floor conditions.

Contrivation Labs Pvt Ltd

- Contributing to the evaluation and future migration of the imaging pipeline to higher-compute edge platforms (such as NVIDIA Jetson) as the system scales in complexity.
- Testing, calibrating, and iterating on the imaging pipeline in coordination with the hardware and factory-automation teams to improve detection accuracy and processing throughput.
- Documenting technical findings, model performance, and system design for internal review and future scalability.

Terms & Conditions

- This internship is a temporary engagement and does not constitute an offer or guarantee of permanent employment with Contrivation Labs Pvt Ltd.
- The intern shall maintain strict confidentiality regarding all proprietary technology, source code, datasets, business processes, and trade secrets encountered during the internship, both during and after its term.
- The intern is expected to adhere to the company's code of conduct, working hours, and reporting structure as communicated by the reporting manager.
- The company reserves the IP rights to all project work developed during the internship period.
- The company reserves the right to terminate the internship in case of a conflict of interest and/or misconduct.
- Upon successful completion of the internship, the intern will be issued a Certificate of Completion / Experience Letter, along with a formal performance evaluation.

We look forward to a mutually rewarding association. We are confident that this internship will provide you with valuable hands-on exposure to real-world AI/ML and embedded vision systems. Please sign and return a copy of this letter as a token of your acceptance of the above terms.

Warm regards,

For **Contrivation Labs Pvt Ltd**

Ramesh Rao
Co-Founder, CEO
Contrivation Labs Pvt Ltd

Acceptance:

I, [Intern's Full Name], have read and understood the terms of this internship offer and hereby accept the same.
